

**Digitech Professional Caliper**  
4527

Bluetooth®  
Technology

**Everything you need for forest inventory!**

This all-in-one, space-saving tool allows you to take a comprehensive, accurate inventory and quickly record species, diameter, and height information. The caliper comes complete with a Digitech Professional Computer with Bluetooth® capability for easy wireless communication with other compatible instruments including GPS receivers, bar code scanners, printers, and more. The Digitech Professional's non-incremental, non-contact measuring system requires no calibration and provides accurate diameter readings time after time. In addition, the non-contact system results in no mechanical wear and low power consumption of the rechargeable battery. The caliper's detachable scale allows for easy transport and storage. Replacement scales are available and can be interchanged with calipers of various sizes for added flexibility. The Digitech Professional Computer can be used together with the caliper or alone as a handheld unit. You can also use the computer with Haglöf T-Cruise software (sold separately). Individual Digitech computers are also available, with and without Bluetooth capability.

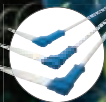

18" Digitech Professional Caliper	2.5 lbs.	<b>59751</b>	<b>\$2330.00</b>
